

## ***Education Committee Report:***

### **More Great Seminars Coming Soon!**

The Education Committee has been busy through the spring and summer 2010. Seminars each month have been well attended and provided educational input on a number of interesting topics. Panels have been well represented by our owner members as well as participation from experts within the Construction Management and engineering communities. The Education Committee has geared our seminars to be fun and interactive

while maintaining our primary mission to focus on improving the quality and relevance to the construction management profession and to our industry. As always, we are looking forward to improving owner outreach/participation and hope to offer at least one project site visit opportunity this year. The committee continues to offer a strong agenda of seminars for the remainder of the year including the following topics:

- a. Community Relations
- b. BIM/IPD
- c. Project Tours
- d. Managing Green
- e. Teamwork, Public/Private Partnerships

Owner/Agency representatives who have and will participate as panelists this year represent OCTA, LAWA, Port of Long Beach, Port of Los Angeles, UCI, Metro, and LACCD; some sessions have been lively with lots of input and questions from the audience. As always, the committee welcomes suggestions for new topics that we can consider for future offerings. Keep an eye on your in-box for further details on these seminars as they are released over the next few months!
