

## **Friday Afternoon CCM Review Seminars & Day-Long CCM Review Sessions**

Here is a quick update on what the CCM Committee has in store for our membership this year. We are finalizing the dates to set up a regular schedule for Friday afternoon CCM review seminars, and are also looking at the feasibility of all-day CCM review sessions to help our membership get ready for upcoming CCM exams. The current dates of CCM Exams are:

- April 12
- May 17
- August 16
- October 12
- November 8

However, we can, independently, schedule an exam any time near the dates of a “Standards of Practice Review Course.” The CM Standards of Practice Review Course (CMSPRC) is designed for an advanced group of CM’s preparing for their CCM exam, and contains eight (8) instructional modules delivered over three (3) consecutive days. Content is derived from the Construction Management Core Competencies and the CMAA Body of Knowledge. Instructional materials and instructors are provided by the CMAA National Chapter. The CMSPRC involves a substantial commitment by an interested sponsor, so please contact the CCM Committee if you are interested in sponsoring the review course.

The CCM committee also has materials available to explain the CCM Certification process to interested groups of individuals at your company or project site. Please let us know how we can help to explain the process or support you in obtaining your CCM.
