

Student Outreach Committee in full swing!

The Student Outreach Committee is actively coordinating with our local university chapters at University of Southern California and California State University Northridge. We are working to form new chapters at California State University Long Beach, California State Polytechnic University Pomona and California State Polytechnic University San Luis Obispo.

Our Annual Scholarship and Project Awards Banquet will be held at the Pasadena Convention Center on April 2nd, and will once again serve as a venue for us to recognize the scholastic and professional excellence that has made our industry and this organization so rewarding. Please note that applications for both the scholarship and project awards can be downloaded from the chapter's website: www.cmaasc.org. The updated scholarship applications have recently been distributed and our campus liaisons are coordinating campus presentations to recruit scholarship applicants.

We're also looking to initiate a new chapter or club in 2009, coordinate current topic campus presentations and encourage students to take advantage of free registration at CMAA Southern California Chapter events.
