

## CCM Committee Highlights

Your 2009 CCM Committee continues to find opportunities to serve the membership this year, and is looking for a venue for a Certified Construction Manager Standards of Practice course to be held September of 2009. As part of our arrangement with CMAA National, a certification test will be offered within one week of this course, so this is a great time to get certified. Set yourself apart from the competition by demonstrating your construction management expertise. Please look for upcoming announcements, but be sure to book your space soon, as there are limited seats available.

We are providing an Application Workshop 3:30 pm, July 16 at the Irvine Marriott to help you prepare for the upcoming Standard of Practice Course and maximize your ability to get certified.

The CCM Committee is also ready to explain the benefits of certification to your company or project group. We have a short presentation that hits the important points, and are ready to support you in your endeavors to gain the CCM certification. Please contact the committee and we will be happy to meet with you and your group.
