

Student Outreach Update

Student Speaker's Bureau - The Student Outreach Committee is pleased to report a new service for our members and our constituents within our local area colleges. We discovered that with a reasonable lead time from any of our local construction management professors, CMAA can provide speakers to the professor's classes. Given the wide range of exemplary skills of our CMAA membership, we offer the professors and students a useful, real-world visit from industry practitioners. More to come on this exciting service as we further develop it. In the meantime, any professors wishing an industry speaker for their class are encouraged to contact the Southern California office to let us help you find the appropriate speaker.

Scholarships - Full time undergraduate and graduate students at ABET and or ACCE accredited programs are welcome to apply. We've let the schools know of the opportunity, but just to help ensure all eligible students get the word, if you know of a full time construction management student, encourage them to check the website for eligibility.
