## Is Your Project Healthy?

### 5 Questions That Every Manager Should Ask Their Scheduler

Today's trend of delivering more data does not always mean our industry makes smarter decisions. This trend is flooding the industry with unusable information that masks or hides important key indicators. We learn more from well asked questions than gigabytes of reports from P6 or Microsoft Project. Understanding a project's time performance issues are only further complicated by ever increasing demands of managers and increasing project complexity.

This session will provide managers the questions they need to ask on a regular basis. The answers to those questions will help them better understand what is happening in the schedule, identify risks before they cost the project time and money, and help in balancing all of their job responsibilities.

### Learning Objectives

- The ability to identify common issues and risks that often adversely affect the accuracy of schedule forecasts
- Technical skills that help owners and construction managers concentrate on the most important scheduling subjects and items when evaluating a project's time performance
- Professional skills that will help managers strike a balance between scheduling and planning responsibilities with their other day-to-day job responsibilities

### Seminar Leaders

John Armstrong, PMP  
Scheduling Manager

Kitchell CEM, Inc.

Hussain Agah, MSCE, PMP, CCM, LEED DB+C  
Director of Facilities Planning and Construction San Bernardino CCD

Wendy Cohen, CCM  
Vice President

Kitchell CEM, Inc.
