**CONTINUING EDUCATION CREDITS  
AVAILABLE**

**PROGRAM SUMMARY**

The Infrastructure Investment and Jobs Act (IIJA) has made investments in all 17 categories that the American Society of Civil Engineers graded in the 2021 Report Card for America's Infrastructure and now federal, state, and local governments are undertaking the enormous task of implementing the new programs and allocating the funds both effectively and efficiently. This session will provide an opportunity to learn more about how the IIJA is being implemented, as well as gain an understanding about the challenges and opportunities ahead in the state of California. Participants will also gain an understanding of how they can play a role in advocating for future infrastructure programs, as well as learn how funds are being distributed in California and how projects are being prioritized throughout the state.
